

The leadership at the University of Tromsø prioritizes the use of gender perspectives when developing new research projects at the University. We are there for delighted to invite you as “up-and-coming” researchers at our university to this meeting on;

Gendered innovation

How to employ methods of sex and gender analysis in order to obtain new knowledge and new grants!

Welcome to an open meeting Friday 16th of November with the leading researcher on Gender innovation, Professor [Londa Schiebinger](#) from Stanford University, USA.

Time: 10.00-12.00

Place: Tabeletten, Farmasi

Target group: phd-candidates, post-doc's, researchers and other interested members of the UiT Community

Language: English

Please let me know if you are coming: ingrid.hovda.lien@uit.no

Program;

- Welcome and short introduction on **UiT's New Project on Gendered Perspectives in Research and Teaching** by Pro- rector Curt Rice
- Introduction to **The Gendered Analytical Methods** by Londa schiebinger
- Open discussion/dialogue on interesting case and methods

Why Gendered Innovations?

The Gendered Innovations project offers sophisticated methods of sex and gender analysis to stimulate the creation of gender-responsible science and technology, thereby enhancing the quality of life for both women and men worldwide.

It also:

- Add value to research and engineering by ensuring excellence and quality in outcomes and enhancing sustainability.
- Add value to society by making research more responsive to social needs.
- Add value to business by developing new ideas, patents, and technology.

The University of Tromsø was awarded the Gender Equality Award from the Ministry of education and research in 2011. The award money 2 million nkr, will be used on strengthening the gender perspectives in research and teaching at the University of Tromsø. This will be announced soon!
